To Whom it May Concern,

It is with confidence that I can write a letter reflecting my experience with Steven Szolcsanyi and Parkland Media & Technologies. While I have known Steven personally for many years, he was an easy choice to turn to when our company, Espar Products, chose to create a video of a technical session that was being put on by our parent company J.Eberspaecher from Germany. We turned to Parkland Media & Technologies with short notice and over 3 days they recorded endless presentations that incorporated both oral and power point presentations. They seemed invisible as they seamlessly went about their business. Over the following weeks they were able to condense the 3 days into a number of hours as well as integrate the powerpoint presentation into a smooth transition with the oral presentations. In addition Steven and his group developed a creative lead-in to the entire session.

On a whole the job requested was the job done and it is with trust that I recommend Steven and his group to one who is looking for creativeness on video with utmost professionalism.

Respectfully

John Dennehy
